

JOSÉ MIGUEL VIVAS SÁNCHEZ

Full Stack Developer | Generative AI, LLMs & Big Data Specialist

Cáceres, Spain • +34 645 31 63 09 • jose.miguel.vivas.sanchez@gmail.com
linkedin.com/in/josemiguelvivassanchez • github.com/josemivivass • josemivivass.com

PROFESSIONAL SUMMARY

Full Stack Developer specialised in Generative AI, LLMs and Big Data, with hands-on experience in Quality Engineering. I design and build scalable web applications with Angular, React.js, Node.js and Python (FastAPI), and I integrate AI solutions based on LangChain, RAG, agents and the OpenAI API. I combine the rigour of QA methodologies with a product-oriented approach to deliver robust, maintainable systems deployed in the cloud.

PROFESSIONAL EXPERIENCE

Full Stack Developer • Computaex

Cáceres, Spain | March 2026 – June 2026

- Development and evolution of a Full Stack web application with a client-server architecture, using Python on the backend and React.js on the frontend.
- Implementation and consumption of REST APIs for communication between services, ensuring data integrity and endpoint performance.
- Application of version control best practices with Git, team code review, and continuous delivery in a collaborative environment.

Quality Engineer • ViewNext

Cáceres, Spain | March 2024 – July 2025

- Executed manual functional testing and managed the full defect lifecycle in Micro Focus ALM, improving incident traceability and resolution.
- Validated REST and SOAP APIs with SoapUI and Postman, ensuring service integrity and consistency of integration contracts.
- Designed and executed load and performance tests with LoadRunner and JMeter, monitoring real-time metrics with Grafana and InfluxDB to detect bottlenecks before production deployments.
- Collaborated with development teams in an Agile environment to report findings and prioritise critical fixes.

International Camp Counsellor • Camp Hilltop

Hancock, New York, USA | June 2022 – August 2022

- Coordinated groups of minors in a 100% English-speaking environment, strengthening communication, leadership and intercultural teamwork skills.

EDUCATION

Cross-Platform Application Development (DAM) • IES Ágora

Cáceres, Spain | September 2025 – June 2026

Specialisation in Artificial Intelligence and Big Data • IES Ágora

Cáceres, Spain | September 2024 – June 2025

Web Application Development (DAW) • IES Ágora

Cáceres, Spain | September 2022 – June 2024

ADDITIONAL TRAINING

- **Generative AI & LLM Apps Bootcamp (2025):** AI agents, LangChain, OpenAI API, RAG, LLMOps and Vector Databases.
- **Machine Learning with Python:** Scikit-learn, predictive models, supervised learning and exploratory data analysis.
- **SQL from Beginner to Advanced:** Complex queries, joins, subqueries and relational database management.
- **Power BI Desktop:** Data modelling, DAX and corporate KPI visualisation.

TECHNICAL SKILLS

Artificial Intelligence & Data Science: Python, LangChain, RAG (Retrieval-Augmented Generation), AI Agents, OpenAI API, Prompt Engineering, LLMOps, Vector Databases, Embeddings, Scikit-learn, Machine Learning, Pandas, NumPy, Jupyter, Power BI.

Full Stack & Mobile Development: Angular 21, React.js, TypeScript, JavaScript, Node.js, Express, Python, FastAPI, HTML5, CSS3 / SCSS, SSR (Server-Side Rendering), GSAP, Three.js, Android, Java.

Databases: SQL, MariaDB, MySQL, relational modelling, vector databases.

Cloud, DevOps & Tooling: AWS (Amplify, EC2), Cloudflare, Git, GitHub, Linux, Nginx, REST APIs, JWT, continuous integration and deployment.

QA & Testing: JMeter, LoadRunner, Postman, SoapUI, Micro Focus ALM, Grafana, InfluxDB, functional, load and API testing.

Methodologies: Agile, Scrum, Kanban, version control, peer code review, clean code best practices.

FEATURED PROJECTS

Full Stack Personal Portfolio with AI Chatbot — josemivivass.com • github.com/josemivivass/Portfolio

Stack: Angular 21 (SSR) · Node.js 22 + Express 5 · MariaDB · AWS Amplify + EC2 · Cloudflare · Groq API.

- Angular frontend with Server-Side Rendering (SSR) deployed on AWS Amplify, and Express 5 backend on EC2 with Caddy + PM2 + MariaDB 10.5.
- Custom REST API (api.josemivivass.com) with JWT authentication and an admin panel managing profile, projects, messages and chatbot.
- Conversational chatbot integrated with an LLM through Groq Cloud, answering visitors in real time.
- Animated landing with GSAP + ScrollTrigger, 3D background with Three.js, custom ES/EN i18n and contact form protected by reCAPTCHA v2.

Internal web application — *Computaex*

Stack: Python · FastAPI · React.js · LDAP · InfluxDB.

- FastAPI REST.
- React.js frontend consuming the REST API, with management panels and real-time metrics and LDAP / InfluxDB integrations.

LANGUAGES

Spanish: Native.

English: Certified B1 — working proficiency C1 (work experience in the United States).
